Current/tidal stream in Svendborgsund 2024 - Sommertid

Data used: The data have been found by observing the setting of the current off the port of Svendborg and under normal weather (wind) conditions.

Current: The setting of the current is either east or west going and the turn of the tide between the two directions is on the time stated in the table and on the date.
Note that time is given to ZT (-2) "Summer time".

Example about the direction of the current/tidal stream (just on top date):

From 0510 until 1120 the current is running east, from 1120 until 1737 the current is running west

From 1737 until 2350 the current is running east, from 2350 until 0600 next day the current is running west.

Normally the current has its peak at the time between the two directions. Normally the peak is 2knots to max 3knots

Date-column: The column to be:
The top must be stated by the date of either Full or New Moon (about 15 days between those two phases)

2024:	Full Moon:	New Moon:
